

Theme Editor Prototype 1.0 Testing

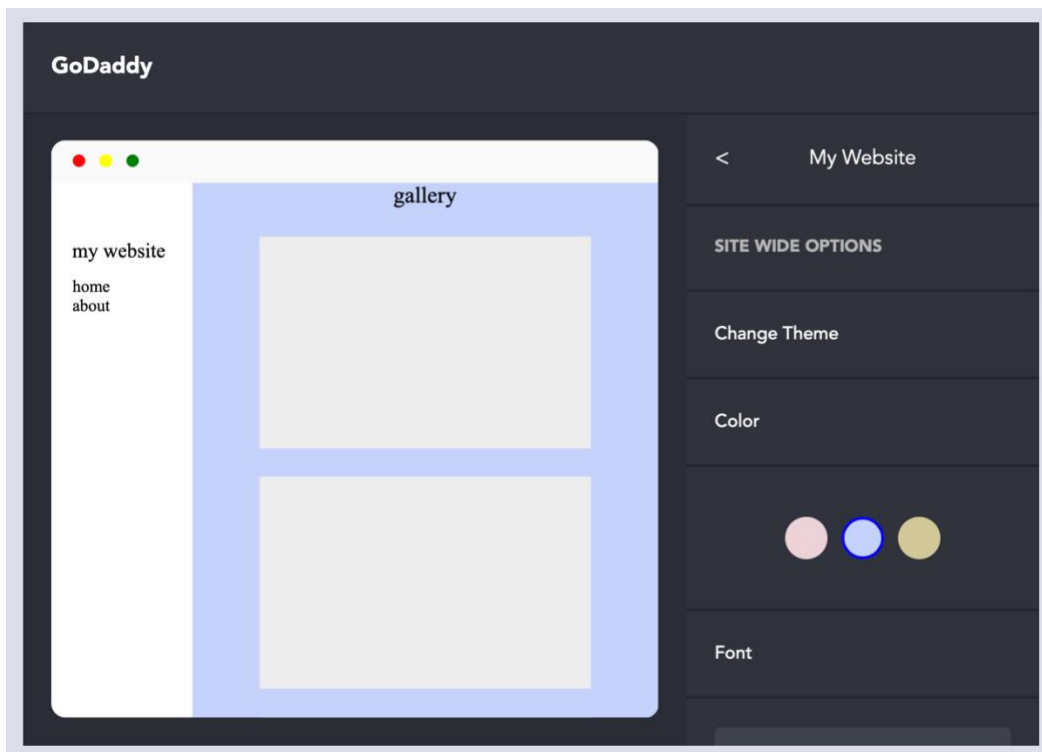

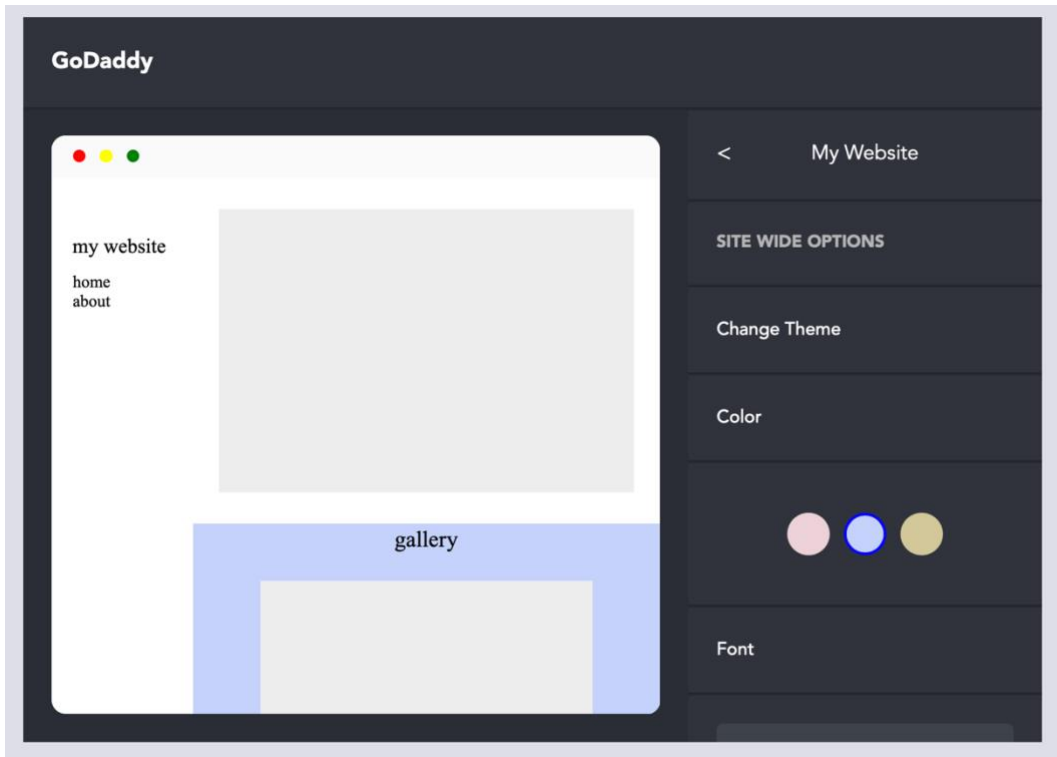

Objectives of the Test:

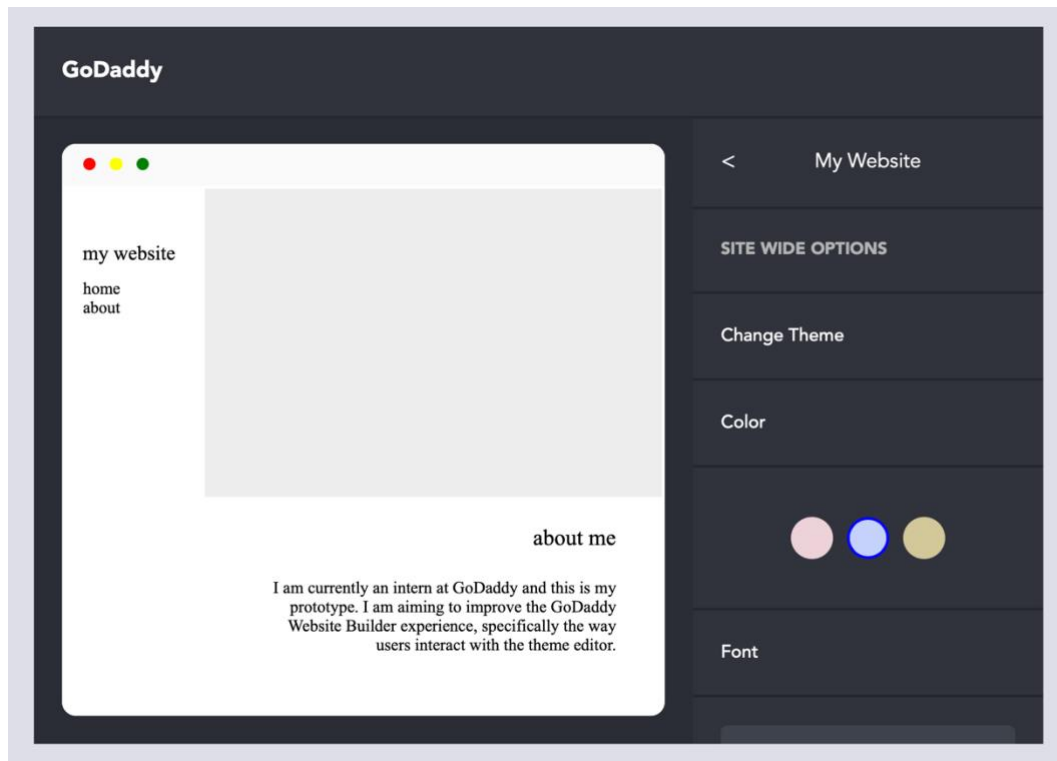

1. User should change the background color of the gallery widget. Every other widget should be white.
2. Gallery widget layout should be changed to stacked
3. User should change about layout to “wide image” and the alignment of the about text should not be default, rather left or right aligned.
4. User should change the font to Serif
5. User should change the theme to “Sidebar”

Test (add 5 point question after each task):

1. Imagine you want to change the background color of the header section of your website to white. Demonstrate how you would do this.
2. Scroll down to your gallery. Imagine you want to change the background color of your gallery to blue. Demonstrate how you would do this.
3. Now you want to change the way the images look in your gallery. You want them to be in one column. Demonstrate how you would do this.
4. Now that you have spent some time editing your home page, imagine you want to work on the about page. Go to the about page.
5. Imagine that you want to change the look and feel of the about section. Demonstrate how you would do this.
6. Now imagine that you would like to change the position of the “about me” paragraph. Demonstrate how you would do this.
7. Imagine that you would like to change the font on your site. Demonstrate how you would do this.
8. Imagine you want to change the overall look and feel of your website. Demonstrate how you would do this.

If users can easily and seamlessly follow these directions, then they’re website should look something like the screenshots below (color, text alignment may be different):

Post Test Questions:

1. How did you feel about editing the site?
2. How easy was it to find specific editing features (ex finding where to edit font)?
3. How would you describe your experience building websites?
 - a. Beginner, intermediate, expert
